Port Fouad, Port Said, Egypt | Availability: Full time - Contract | Citizenship: Egypt

National ID: 30101010301217

PROFESSIONAL SUMMARY

Civil Infrastructure Engineer with hands-on experience in managing and delivering large-scale infrastructure projects, including water supply, sewerage, irrigation, and utility networks. Experienced in project management, cost control, claims preparation, QA/QC, and coordination with clients, consultants, and contractors. Proven ability to lead site operations, improve project performance, and deliver projects safely, on time, and within budget. Looking to contribute my technical and managerial ability to complex infrastructure developments.

WORK HISTORY

AL Qoptan Constructions

Cairo, Egypt

Project Infrastructure Engineer – Irrigation & Water Supply Stations Expansion

7/2025 – present

Worked as a sub-contractor GTCI Company. At Taj City Compound – Zahraa Madinat Nasr. diversion and re-routing of existing water supply and sewerage networks to accommodate the new infrastructure layout. The project aims to enhance the overall efficiency and operational capacity of the station through the installation of deep utility networks at depths reaching up to 9 meters, utilizing 1000 mm diameter corrugated high-density polyethylene (HDPE) pipelines. Scope of work also includes excavation support and shoring systems to ensure trench stability and safety during deep excavations, in addition to the replacement and relocation of existing manholes with newly constructed ones to avoid conflicts with the expanded storage tanks. **Project Value:** Approximately EGP 680 million.

- Managing the construction and expansion of irrigation and potable water networks
- Coordinating with consultants, contractors, and client representatives to ensure alignment and compliance
- Planning and controlling project schedules, resources, and site operations
- Overseeing installation, testing, and commissioning of HDPE piping systems and related components
- Ensuring strict adherence to QA/QC procedures and HSE regulations
- Monitoring progress, resolving technical challenges, and reporting to senior management
- Led the preparation, negotiation, and successful approval of claims representing around 50% of the total cost value, resulting in an improved project profitability with a net margin reaching 35%.
- Secured a second contract directly from the client, demonstrating high satisfaction and confidence in project delivery

Project Infrastructure Engineer of Damietta

2/2024 – 12/2025

Worked as a sub-contractor Military Production Company. Haya Karima" projects in Damietta can be referred to as "Decent Life" projects in Damietta in English. The initiative, launched by the Egyptian government, aims to improve living conditions for the most vulnerable populations, particularly in rural areas. These are the specific development projects being implemented under the "Haya Karima" initiative within Damietta Governorate.

- Made invoices of the project and tracked the progress.
- Saved 20% from the budget of the contract and save almost 6 months from time schedule.
- Follow up on project accounts, accounting for all workers and equipment on site, all supplies, and other miscellaneous expenses.
- Control all costs, including contracts, timetables, and deliveries to the owner within the project schedule.
- Providing more than 10% of the supplies to the company in accordance with the contracts and technical annexes of the project.
- Implementation of water transmission lines, valve rooms, house connections and sections on the lines.

Future Of Egypt

Project Management and Coordination Engineer in PMO

Da'baa Road, Egypt

12/2023 - 12/2024

Egypt's Future mega project on Da'baa road extends over a total area of one million feddans with 70 investors working on this project and 1200 central irrigation systems.

- Orchestrated owner engineering initiatives, streamlining project timelines and maximizing budget efficiency.
- Devised and executed cost-effective supply chain strategies, ensuring timely material delivery and reducing procurement expenses.
- Performed meticulous quality control inspections, enforcing strict compliance with industry standards and minimizing defects.
- Managed and oversaw operations involving carbon steel, HDPE, GRP, PVC, and concrete pipes.
- Monitored and documented Material Inspection Requests (MIR) and invoices for piping materials across multiple project sites.
- Directed the planning and execution of infrastructure projects spanning 400,000 feddans, ensuring all milestones were achieved on schedule.

Caraway Concrete

Trainee Infrastructure Engineer

Port Said, Egypt

07/2022 - 10/2022

- Contributed to the construction of culverts, ensuring adherence to engineering standards and project specifications.
- Checked soil capacity and loads.
- Implemented quality control measures to protect concrete structures from water damage and ensure long-term durability.

ELMAS Construction

Trainee Construction Engineer

Port Said, Egypt

01/2021 - 12/2021

- Executed steelwork and concrete construction projects, emphasizing quality assurance and operational efficiency.
- Produced precise shop drawings and comprehensive tender documents, streamlining the planning and bidding processes.
- Leveraged AutoCAD and Excel to generate accurate bills of quantity, ensuring cost-effective project execution and reducing budget.

EDUCATION

Port Said University

Bachelor of Science in Civil Engineering

Port Said, Egypt

09/2018 - 07/2023

CERTIFICATE'S

- Infrastructure Implementation
Diploma
Kayan Academy
- Autodesk Revit Structure
EGY NILE
- TECHNICAL OFFICE DIPLOMA
EGY NILE
- Structural Design Diploma
I LEARN
- Microsoft office
Port Said University

SKILLS

- **SOFTWARE SKILLS:**

AutoCAD, safe, Autodesk Revit, CSI Column, Etabs, SAP 2000, Microsoft Excel, Microsoft PowerPoint, Microsoft Word, Invoices, BOQ.

- **HARD SKILLS:**

MANAGEMENT: project management, Budget management, Resource management.

QUALITY CONTROL: Quality assurance process, Testing and Inspection, Technical knowledge.

COST CONTROL: Financial analysis, Cross-functional Coordination, Process Optimization.

TIME MANAGEMENT: Time schedule, Strategic planning, Risk analysis.

COORDINATION: Conflict resolution, Effective scheduling, Negotiation. Strong communication.

KEY ACHIEVEMENTS

- **First Place in ACI Fiber Reinforced Concrete BowlingBall Competition**

Winner of first place in an innovative design competition, showcasing creativity and problem-solving skills. Certificate of winning first place in the competition from ACI AASTMT.

- **The graduation project**

involved foundation design aimed at increasing soil capacity with economically viable solutions, demonstrating a commitment to sustainability and cost-effectiveness.
